SUMMARY

Enthusiastic fourth-year Computer Engineering student with a strong passion for Generative AI, Retrieval-Augmented Generation (RAG), and intelligent agent systems. Possesses hands-on experience building LLM-powered pipelines using LangChain, LangGraph, and advanced RAG techniques, alongside a solid foundation in programming, machine learning, and deep learning. Demonstrates excellent problem-solving abilities, analytical thinking, and a drive for continuous learning. Eager to apply Generative AI knowledge to real-world projects and contribute to innovative solutions within a forwardthinking organization.

EDUCATION:

Faculty Of Engineering, Ain Shams University - Cairo, Egypt Bachelor's degree, Computer Engineering	September 2022 - Present
Egyptian Language School - Cairo, Egypt High School Diploma	September 2008 - July 2022

WORK EXPERIENCE:

Operation and Data Analyst, Medical Life.	February 2025 - May 2025
- Collected, cleaned, and analyzed clinical and operational data to generate actionable insights, supporting decisionmaking within the orthopedic department. - Assisted in streamlining workflows and improving service delivery efficiency by developing data-driven reports and visualizations. - Collaborated with internal team to ensure timely execution of tasks, aligning departmental objectives through effective communication and data-supported recommendations.	
Intern, Pharaonic Petroleum Company (PHPC)	September 2023
- Observed and supported engineering operations related to petroleum extraction and processing - Gained practical exposure to industrial safety standards, field operations, and equipment maintenance - Participated in technical briefings and site tours to better understand oil and gas workflows	

PROJECTS and COURSES:

- **Generative AI Diploma, Edges Academy - January 2026 - May 2026**
 - Python Basics & OOP
 - Transformer Architecture & LLM Concepts
 - Retrieval-Augmented Generation - Naive & Advanced RAG
 - Machine Learning & Deep Learning Review
 - LangChain Framework & LCEL
 - LangGraph, Multi-Agent Systems
- **Artificial Intelligence Course with National Telecommunication Institute (NTI) -Powered by HUAWEI.**
 - Python programming
 - Libraries such as (NumPy, Pandas, matplotlib)
 - Data Handling
 - Machine learning
 - Deep learning
 - AI Ethics and Social Impacts

- **Course Projects:**
 - House Price Prediction Competition:** A competition to predict house prices using trained models on supervised datasets.
 - App Rating Prediction Competition:** A competition to predict App Ratings using trained models on supervised datasets.
- **Hotel Reservation System -using MySQL and GUI:C#**
 - Developed a hotel reservation database system by designing EER diagrams and relational schemas, creating tables, procedures, and queries in SQL, and building a user-friendly GUI with C# to enhance system usability.
- **Social Media Platform -using Java and SQL**
 - Designed and implemented a social media platform that allows users to post content, add comments, and like posts, utilizing Java for application logic and SQL for data storage.
- **Airline Reservation System -using Java and Software Testing**
 - Built an airline reservation system in Java and conducted comprehensive software testing, including unit testing, integration testing, white-box testing, and black-box testing.
- **Single Cycle MIPS Processor -using VHDL**
 - Designed and implemented a single-cycle MIPS processor using VHDL to achieve efficient instruction execution.
- **Syntax and Lexical Analyzer -using C++**
 - Developed a syntax and lexical analyzer in C++ to process and analyze source code by dividing input strings into lexemes and verifying code syntax using appropriate analysis techniques, grammar rules.

LANGUAGES

- Arabic - Native
- English - Fluent

CERTIFICATIONS

- Generative AI Diploma Certificate, Edges Academy
- Huawei Artificial Intelligence Course Certificate with NTI
- Best Informative Presentation -2nd Place with Faculty of engineering ASU

KNOWLEDGE

- **AI Frameworks & Tools:** LangChain, LangGraph, Streamlit, FAISS, Hugging Face, RAG Pipelines
- **Source Versioning:** Git and GitHub
- **Programming Languages:** C++, C, Python, SQL, Java, CSS, HTML
- **Microsoft Office:** Microsoft Excel, Microsoft Word, Microsoft PowerPoint

SKILLS

- Problem Solving
- Time Management
- Decision-Making
- Teamwork
- Leadership
- Creativity
- Critical Thinking
